02 | GROUP BENEFITS: GROUP LIFE COVER

Employers have an important role to play in their employees' financial lives. It is a responsibility that no employer can take lightly as providing proper care for employees contributes to the stability and desirability of your business, and the financial wellness of your employees.

Our employee benefits solution is simple to implement and easy to understand.

The group scheme protects employees' and their families' financial future. The Plan can be tailored to your business' needs and can include a cost-effective savings or pension solution, life, disability and critical illness cover.

The Plan is a packaged solution and the structure provides an effective legal entity to accumulate benefits and retirement funding.

O3 | GROUP BENEFITS: CORPORATE SAVINGS SCHEME

The International Life Group Benefit Plan is a collection of individual savings policies arranged by an employer for their employees. It is designed on a group basis so that it is easier to administer. Within the scheme, members have their own personal policy which is a long-term investment savings plan designed to help them plan for their retirement.

Through the Scheme members can invest in a selection of risk profiled portfolios - the Default Investment Solution, or alternatively may, together with their financial advisor or employer, select from a range of managed portfolios, funds or ETFs.

Customers using our white label products can leverage off our integrated back-office expertise and advanced technology while still maintaining their own brand identity and client relationships.

A rapidly changing business environment can cause complexities that can divert a company from its true goals of driving earnings and profitability. Issues like product development, operational execution, technology implementation and maintenance can take preference, lessening the time a business can spend on its core competency. Using white label products can free up the time and resources of an advisory business.

At International Assurance we have the necessary experience to empower your organisation to increase revenues and expand market share.
